

With PantoneLIVE Production - Plastic, Coatings and Textile digital libraries, brand specifiers and manufacturers are able to work from the same digital color standard from design to production.

# PantoneLIVE

## Production

Plastic, Coatings and Textile

### Overview

PantoneLIVE is an end-to-end communication ecosystem, bridging the gap in color communication within print and manufacturing supply chains. The PantoneLIVE – Plastic, Coatings and Textile digital libraries are accessible through a cloud-based repository which consists of tested spectral color values and brand palettes based on the PANTONE Fashion, Home + Interiors Guides, PANTONE Plastic Standard Chips, and the PANTONE PLUS Coated Formula Guide. PantoneLIVE PCT gives color Specifiers, Designers, Color Material Producers, and Final Manufacturers the ability to communicate consistent color targets throughout every step of the process – inspiration, creation pre-production and production.

### Key Benefits

While the PANTONE guides and chips are important reference materials when designing products, having that information along with the spectral data in a digital workflow proves to be a very powerful resource for brand specifiers and manufacturers working with plastic, coatings or textiles. Minimize the time spent looking for the physical reference guides, access accurate color formulas, and reduce the time to market by significantly decreasing the time between iterations.

- Gives color specifiers and manufacturers' instant access to the most up to date Pantone colors for plastic, coatings and textile applications in a digital format to ensure design intent is achieved, and color is produced quickly and accurately.
- Reduce waste and unnecessary time spent on iterations passed back and forth between design and production.
- Integrates with X-Rite Color Management measurement tools and quality control software creating a seamless color management workflow and ultimately ensuring accurate color specification, communication and production across the supply chain.
- Accessible through a cloud-based repository so every stakeholder in the supply chain can quickly and easily access the same spectral values for a specified color.

## Recommended Solutions

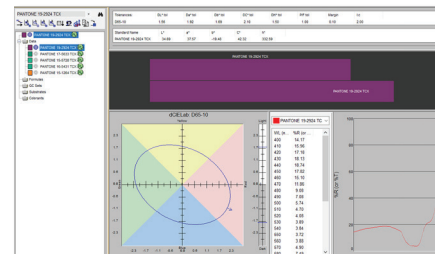

### Ci7x00 Family of Benchtop Spectrophotometers

When combined with NetProfiler and Color iQC or Color iMatch software, the Ci7x00 family of benchtop sphere spectrophotometer delivers a complete color measurement and management solution that is stable, delivers true consistency and is easier to service than any other benchtop sphere spectrophotometer in the market today. By using digital references from the PantoneLIVE Production – Plastic, Coatings and Textile libraries, in addition to physical reference standards, brands can be certain that accurate color will be specified across the entire supply chain.

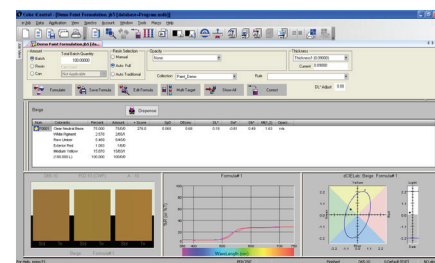

### Color iQC

With Color iQC as an integral part of the color quality control workflow, specifiers and suppliers alike can be assured that design intent is carried through to the final product. Whether you are approving production samples or finished goods, Color iQC adapts to your workflow to make controlling color fast, easy and accurate. By using Color iQC with a PantoneLIVE Production – Plastic, Coatings and Textile license, operators can rest assured they are using the most up-to-date spectral values. Color iQC is available in a variety of configurations to meet the most stringent quality control needs.

### Color iMatch

Using spectral matching, Color iMatch formulation software automatically determines the best colorant solutions based on selected parameters, increasing formulation control and overall productivity and profitability for manufacturing color producers.

## Current Supported Libraries

Fashion, Home + Interiors Library	Measured With
PANTONE® FHI Cotton TCX	Bench Top Sphere
PANTONE® FHI Nylon Brights TN	Bench Top Sphere

Pantone Matching System (PMS) Library	Measured With
PANTONE® PMS Guide (Master)	Hand Held Sphere
PANTONE® PMS Guide (Master)	Hand Held 45/0

PANTONE® PMS Plastic	Hand Held Sphere
PANTONE® PMS Plastic – UVCut	Bench Top Sphere
PANTONE® PMS Plastic – UVCut	Bench Top Sphere
