

eXact Standard Spectrophotometer

Setting the Standard for Color Measurement

The eXact Standard spectrophotometer is specifically designed for printers and packaging converters to help ensure color validation of CMYK and spot-color inks and also leverages industry color standards for increased press process control.

Streamline Jobs on Press

- Provides all density metrics plus colorimetric/value functions resulting in better validation of color control
- Supports all industry print standards: G7, ISO, PSO, and Japan Color
- Leverages BestMatch to provide you with the guidance you need to help determine if you can achieve a closer match to a specific color standard adjusting ink on press

Best in Spot Color Support

- Delivers direct and seamless access to latest Pantone libraries and PantoneLIVE standards with optional license
- Provides enhanced spot color handling by allowing creation and management of standards and color libraries to be located on your device

Enhanced Measurement Capabilities

- Reduces wasted time and materials with simultaneous measurements of M0/M1/M2/M3 conditions
- Provides M1 part 1, for accurate measurement of neon inks
- Facilitates creation and management of standard colors directly on the device
- Provides mobility in the pressroom with optional wireless Bluetooth connectivity

eXact Standard Spectrophotometer

Additional Features:

Scan Option

Available as an option for the Standard and Advanced models. The eXact Scan is easy-to-use and provides quick scanning capabilities for use in offset, digital, flexo, prepress, and other environments for spot measurement and scans to better understand, control, manage, and communicate color across the entire workflow.

Xp Offering

All eXact models are available in Xp mode, meaning they are specifically designed to help packaging printers and converters more accurately measure color on flexible film materials and other print and packaging substrates without the need for polarized measurements (M3).

Service Support and Warranty

X-Rite's color analysis and measurement solutions are engineered and manufactured to the most rigorous quality standards. These standards are backed by comprehensive global service, superior phone and web support, and preventative maintenance options to optimize your long-term investment. We have developed service support and warranty plans that are unique to your organization's specific products and needs.
